

# Multiport Communications Cards

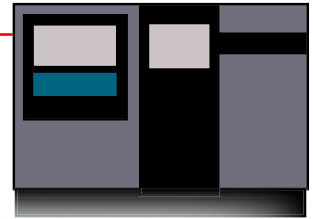

**CIMCO DNC-MAX Server PC**

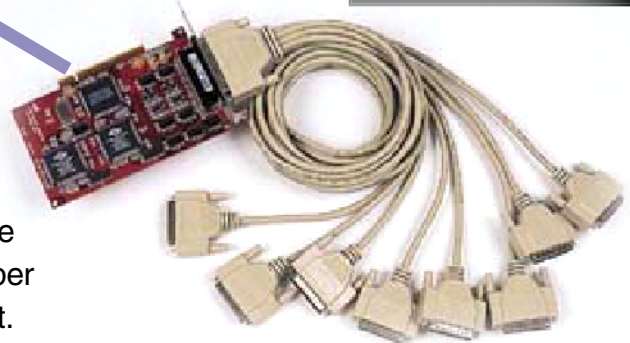

Multiport Card (inside computer)

RS232

Machine controller

Add-in Multiport Communications Cards for PC's expand the serial communications capabilities of the PC beyond the standard one or two ports. These ports offer one connection per CNC machine, making switchboxes redundant.

Digiboard, Moxa, Rocketport etc.

Since standard RS-232 connections are used, CNC machine tools must be located within distance limits for RS-232 connections.

The Multiport Communications Cards are available in 4, 8, 16 and 32 port versions. Several Multiport Communications Cards can be installed in the same PC.
